

WASTE MANAGEMENT (Garbage, Recycling, Construction & Yard Waste)

GARBAGE & RECYCLING

The Edgewater believes in recycling and encourages all residents to participate in the City of Kawartha Lakes waste management system. See the poster *What Goes Where* (link below) that is posted in each garbage area that will help you sort the garbage, recycled materials and hazardous waste.

In the garbage enclosure located in each parking lot there are plastic bins marked for garbage, recyclable containers (BLUE box) and recyclable paper/fibre & flexible plastics (GREEN box). As well there is a small container for used batteries and a yellow plastic box for rinsed and empty wine and liquor bottles. The proceeds from empty glass alcohol bottles are donated to a local charity. Please do not put empty metal beer cans in the yellow bin or blue box - they must be returned through the Ontario Deposit Return program (eg. The Beer Store)

We currently do not have an organics collection at Edgewater.

It is IMPERATIVE that materials designated for the garbage bins are placed in CLEAR PLASTIC bags or the collectors may refuse to take the entire bin. The City is very particular about picking up the garbage so if unsure of where or what please ask your building representative or a board member. See Rule 13.

Garbage and recycling are collected on Mondays with alternating Blue Box and Green Box pick-up.

Special large item disposal days, determined by the board, occur twice yearly (spring and fall) where large items can be brought to a designated area in both parking lots only on the day specified. No items slated for this are to be left on patios or common elements before the evening prior to the scheduled pick up.

Except for the special garbage disposal days, Owners must arrange for the removal of items not accepted in the regular garbage pick-up. The City of Kawartha Lakes has special days for hazardous waste, electronics, textiles, etc.

The Lindsay Ops landfill at 51 Wilson Rd, Lindsay is where to take waste not accepted for regular pick-up.

WASTE MANAGEMENT (Garbage, Recycling, Construction & Yard Waste)

CONSTRUCTION WASTE

For renovations where you expect to have a large amount of construction waste please contact the Board or property manager to discuss your options with you and your contractor.

If you are a do-it-yourselfer, it is your responsibility to dispose of construction waste at the landfill site in Lindsay. Tipping fees will apply.

YARD WASTE (Spring & Fall)

During the gardening months, Durnan will have a truck or trailer available in the Mill Street parking lot where you can dispose of any loose leaf and yard material from your patio. You are not required to place it in a brown yard waste bag. If it is too difficult for you to take it there, you can pile it neatly just off your patio so that Patrick can see it during his rounds and pick it up with his small tractor.
